

Fundraising Milestones

\$6,000,000

At \$6,000,000, the Community Trail Farm will be equipped with key amenities such as a new Welcome and Education Center that allows for more in-depth programming, historic building restoration, event and programming facilities, stream ecology improvement, and deeper land restoration.

\$5,000,000

At \$5,000,000, ORA Trails will be able to initiate further development, including a 2+ multi-use lane bridge, paved all-weather trail to increase accessibility, build service infrastructure and maintenance buildings, complete construction on 15 miles of world class trails, and provide basic restroom facilities.

\$4,000,000

At \$4,000,000, ORA Trails will secure land ownership, initiate trail construction, and continue programming. Operation and maintenance costs are also reflected in this number.

\$3,000,000

Now, in October of 2024, with the help and support of individuals, businesses, and organizations, we have reached the point to bring awareness and fundraising to the public. We ask YOU to help us reach our goal of \$6,000,000 to be able to fully expand this space into the dreams of the Community Trail Farm.

\$2,000,000

In April of 2024, ORA Trails received a Wisconsin Department of Natural Resources Grant through the Knowles-Nelson Stewardship Program for \$1,150,000 for land acquisition. From 2023-2024, countless volunteers gave hundreds of hours towards restoring the land and cleaning up farm remains.

\$700,000

In April of 2023, we had several donors who stepped forward and believed in this project. Collectively, they gave \$700,000 to help ORA Trails put a down payment for the land.
